

# Tubbercurry Engineering

## Mission Statement

**Our objective** is to provide a high quality, cost effective and reliable service to our customers through excellent workmanship, proactive responsiveness to client requirements and dedication by staff to achieving the highest national and international standards for the projects in which we are involved.

## Company Information

**Established in 1978, Tubbercurry Engineering** has evolved into a company that supplies mechanical engineering design, build & installation services to the construction, commercial and industrial sectors of business.

The key is a highly skilled workforce whereby technical expertise is combined with a pragmatic approach ensuring Tubbercurry can offer services to its customers which are unrivalled within the industry. With an impressive track record and a commitment to growth, Tubbercurry continues to seize new opportunities.

Tubbercurry Engineering and Services has developed by combining the traditional values of hard work, commitment, integrity and reliability combined with a willingness to embrace new technology.

The company prides itself on its ability to execute contracts within program and budgetary constraints.
